The FORTUNE World's Most Admired Companies ranking surveys leading executives from eligible companies, along with directors and analysts, to identify the best-regarded companies within their industries and across industries. FORTUNE collaborated with Korn Ferry on the survey.

The survey evaluates nine attributes of corporate reputation to determine the industry rankings: innovation; people management; use of corporate assets; social responsibility; quality of management; financial soundness; long-term investment value; quality of products and services; and global competitiveness. A company's overall score is determined through an average of the individual attribute scores.
