

Accel Increases PINless Transaction Approval Limits to Provide Consumers Additional Touch-Free Purchasing Opportunities

May 1, 2020

Fiserv debit network increases limits from \$50 to \$100 to address COVID-19 concerns

BROOKFIELD, Wis.--(BUSINESS WIRE)--May 1, 2020-- [Fiserv, Inc.](#) (NASDAQ: FISV), a leading global provider of payments and financial services technology solutions, today announced that it will temporarily increase PINless transaction approval limits from \$50 to \$100 for eligible transactions on its Accel[®] debit payments network. This change, implemented in response to COVID-19, will increase the number of transactions that can be completed without the need to enter a PIN on a physical device at checkout. The change takes effect on May 1, 2020.

Accel, along with the STAR[®] debit payments network from Fiserv, is the first debit payments network in the U.S. to announce increased limits for PINless transactions. In an environment of social distancing, low and no-touch payment alternatives and speed at checkout are critical to consumers and merchants, helping address concerns about interactions at the physical point of sale (POS).

"In the current environment, consumers and merchants are looking for ways they can complete transactions safely and quickly," said Daneen Cady, vice president of Accel for Card Services at Fiserv. "Raising approval limits for PINless transactions allows people to avoid contact with a PIN device and check out more quickly."

Participating issuers are required to support this transaction for any dollar amount up to and including \$100. Participating acquirers and their merchants may optionally support the increase in the transaction limit up to and including \$100.

All other Accel guidelines and rules, including transaction requirements, interchange and fees and exception processing, remain unchanged. PINless POS transactions are limited to POS transactions initiated at a physical device, and are only permitted in a face-to-face, card-present environment.

Some Accel-enabled merchant categories are excluded from the new limits. Excluded categories include direct marketing merchants involved in the sale of travel-related services; those involved in the business of exchanging currency, cashing checks, selling monetary instruments and wiring funds; automated fuel dispensers; and gambling transactions.

In a world moving faster than ever before, Fiserv helps clients deliver solutions in step with the way people live and work today – financial services at the speed of life. Learn more at [fiserv.com](#).
